We are a small family-run Italian company specialised in high-quality décor for distinctive buildings; and over the last 15 years we have succeeded in becoming one of the key international names in luxury interior design.

Our competence also lies in managing the complex task of contracting. Far from being simply an interior design studio or a purchasing company, we undertake particular design projects for big investors, in close collaboration with local and global interior designers, purchasers and hotel chains. We work, above all, in the following sectors: hotels, bars and restaurants; private villas and luxury apartments; offices, designer stores and other retail outlets; health, fitness and recreational centres; museums, yachts and cruise liners.

Interna produces elegant items based entirely on our clients' drawings and particular requirements, using our know-how and advanced technology. The furniture or furnishing may be made from any of the materials that nature or technology provides, while the finish will always be refined.

We respond to those who require that their vision of prestigious décor be hallmarked and be materialised, and who require not only exceptional quality but also the support of a personal guide and a world-class technical service.

Our quality control systems have been assessed and certified to UNI EN ISO 9001:2000 International Standards.
